

New Barrel Damper

New Barrel Damper

GBK is pleased to announce a new derivative of the popular Barrel Damper which adds to the existing products capabilities in several ways.

Barrel Damper - 43011
Range of torques from 2Ncm thru to
10Ncm full details & tolerances
available on request

Taking into account the needs of the market has allowed the development of this new family of Barrel Damper products, principle amongst customer needs were:

- > Full 360° rotation throughout the product range
- > Slightly extended driving ears to provide enhanced mating part flexibility
- > Tighter tolerancing of product throughout the product range
- > Lower initial starting torque at the beginning of the product range

Used in doors, flaps, lids, handles & hinges in many market sectors, Barrel Dampers provide a quality feel & function to your products, adding value protecting mating mechanical components.

GBK continue to improve & define the Motion Control & Panel Access product groups, further new product developments will be made during 2015.

Please contact the sales office for further information or sample requests.

Talk to GBK about your fastening, fixing and component needs and discover why GBK ship product globally and solve problems daily.

Date: January 2015
