

**GBK introduce dampers for public seating venues**

**High Torque Dampers for seating applications 2.0Nm/20kgf/cm | 4.7Nm/47kgf/cm | 5.5Nm/55kgf/cm:**

Suitable for use in Cinemas | Sporting Arenas | Theatres | Waiting Rooms | Libraries | Bus Stations or in fact any public area where there is a need for retractable or closable seating solutions.

GBK Rotary Dampers, for seating applications, are available in 2 size variants with torque options & some offer 'free run' capabilities.

One of the many benefits of using these products is the avoidance of "chair applause" a phenomenon known to anyone who attends a sporting arena on a regular basis & it occurs as the crowd stands to gain a better view of the action, the non damped seats tend to offer an additional applauding noise as they snap closed.

More importantly to this is the sensation of high quality & the reduced strain on mechanical components in the assembly, which increases product life & offers a much better return on the seating investment.

Talk to GBK about your fastening, fixing and component needs and discover why GBK ship product globally and solve problems daily.
