

## Membrane Grommets

### GBK UK Limited offers high quality TPE Membrane Grommets:

As an established GBK range of products, our TPE Membrane Grommets has sold well in comparison to equivalent parts, due to 2 main factors - Quality & Pricing levels

Providing a range of parts from DG9 to DG53 produced in a high quality TPE the GBK range has a wider operating temperature range than a similar PVC product @  $-28^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ , as opposed to  $-25^{\circ}\text{C}$  to  $+60^{\circ}\text{C}$

The principle use is to provide an exit/entry point from/to an enclosure for associated cabling.

Competitively priced & available on short manufacturing lead times, when no stock is available, these parts are an excellent choice for customers needing to protect both cables & enclosures with a high quality competitive solution.

GBK will announce further new Cable Management Products and Cable & Panel Protection Products during June 2016, further strengthening the companies position in these two product groups.

Talk to GBK about your fastening, fixing and component needs and discover why GBK ship product globally and solve problems daily.
